“Agropuzzle II” -

Puzzle for businessmen in agriculture carrying business in a permanently maintainable way II

More details: <http://www.agropuzzle2.eu>

“Agropuzzle II” project is a Partnership between institutions/organizations from Czech Republic, Poland, Portugal, Slovakia, Romania, under LLP Leonardo da Vinci Program (2013-2015) targeting to develop, update and completing specific competence profile and training in sustainable agriculture and agribusiness for students and teachers, with a view for promoting knowledge transfer to all stakeholders in agricultural production and rural community development.

The project experience is a puzzle for a businessman in agriculture, which is part of the agri-services business in agriculture based on modern trends and traditions.

The project try to give students of the public schools and other organizations participating in the project opportunities for obtaining information from a variety of countries and resources for management to use in their own business; as an ex: instructions and inspiration.

Improving living standards through policies and reforms, combined with practical support in terms of capacity, tools, technology, infrastructure and access to basic services should be a priority for national and international efforts for durability conservation of the environment, biodiversity and natural resources.

The project highlight importance of decision makers in the development and promotion of existing resources and local traditions, permanent concern for the initiation of new business ideas for small businesses and permanent contact with the rural community and civil society in the participating countries.
